

CLEVER AUTOMATION WITH THE POWER OF THE SUN.

Solar solutions from **Becker**.

SOLAR ENERGY

BECKER
for you. forever.

ENERGY-AUTONOMOUS AUTOMATION. SIMPLY IMPLEMENTED.

Our solar-powered drives, sensors, and controllers offer an innovative solution for a wide range of applications. Thanks to their self-sufficient energy supply, complex wiring and frequent battery replacements are no longer necessary - saving time, reducing costs, and protecting the environment. Easy installation ensures maximum flexibility, while sustainable solar energy guarantees reliable and efficient operation. Choose intelligent automation that is independent, long-lasting, and environmentally friendly!

SolarKit SK460

Drive solution for roller shutter and screen applications

- Operating mode switchable between roller shutter and screen operation
- Two intermediate positions programmable
- Blockage detection in both up and down directions
- Weather stations and light sensors can be learned
- Noise minimization through soft start and stop
- Threshold values can be adjusted via the transmitter
- Integration into Becker CentralControl possible
- More than 100 operating cycles possible with a single battery charge
- Control and charging electronics integrated into the drive
- Burglary resistance when using rigid shaft connectors
- Compact installation directly in the roller shutter element

SOLAR ENERGY

by  **BECKER**

SensorControl SC861 and SC861 PLUS

Sun-wind sensor for roller shutter and sun protection applications

- Integration into Becker CentralControl possible
- Compatible with the homee smart home system
- Single, group, or central control
- Available as Centronic and CentronicPlus version
- Integrated transmission control indicator
- Control button directly on the device
- Adjustable sensor base for optimal installation
- For all sun protection applications

SensorControl SC631 PLUS

Glass light sensor for roller shutter and sun protection applications

- Enables control of Centronic and CentronicPlus drives and receivers
- Single, group, or central control
- Shading and twilight function
- High-resolution e-paper display
- Control buttons directly on the device
- Switching between manual and automatic mode directly on the device possible
- Easy installation directly on the windowpane
- Defined travel commands possible
- External charging via USB port possible

CentralControl CC41

Smart roller shutter and sun protection control center

Whatever you want to intelligently automate and connect in your smart home, CentralControl brings everything together. As the central hub, it not only controls roller shutters and sun protection but also, for example, lighting - exactly according to your preferences. You can easily configure the settings via your smartphone or tablet.
